

Belzona® 1381 Tank Protection

ID: 8301

Industry: *Fluid Flow* Customer Location: *Slovakia*
Application: *TCC-Tanks and Chemical Containment Areas* Application Date: *2019, 2020*
Substrate: *Steel*
Products: *Firstly we have considered going with Belzona® 1321/1331, but then this customer specified the temperature - close to 60°C, so we offered him Belzona® 1381*

Problem

The problem was an abrasion from water (with salt - CaCl₂, CaSO₄, CaOH, MgOH ...) + silica sand. They were missing 3,5 mm of the wall (at the bottom of the tank) after 4 years of production.

Photograph Descriptions

1. Two tanks are bigger
2. Fluid flow mix
3. Tank was blasted and cleaned
4. Second layer of Belzona® 1381

Application Situation

This customer uses 3 tanks with a fluid flow mix. 2 tanks are bigger, last one is smaller.

Application Method

These tanks were blasted and cleaned. Two coats of Belzona 1381 were applied by spraying. Application was carried out in accordance with Instructions for use.

Belzona Facts

The customer was looking for some good anti abrasive coating some longer time. In the end we offered him Belzona 1381. First one was done in 2019. After one year (because Belzona® 1381 shows itself to be perfect protection, no damage on the surface) the customer wanted to coat another 2 tanks.
